## *...See the Difference*

Fancy Windows Mfg. Inc. is a Canadian owned and operated company based in Edmonton, Alberta. Equipped with 100,000 square feet of the production facility and state-of-the-art technology, we manufacture top quality energy efficient windows and doors. Our products are available in both PVC and aluminum material with various operating styles. With a decade of industry expertise and a reliable partner for window manufacturers, Fancy Windows meets the requirements of our customers with high level of quality products, delivery capability, and competent service. We offer our products and services to homeowners, builders and trade professionals. We also undertake recycling initiatives at our production facility which reduces waste and ensures that our product is more environmentally friendly.

Windows are more than just openings to the world, they are a characteristic feature of your home. The design and style of windows plays a crucial role in defining the overall look of your residence.

With our partnership with Fancy Doors and Mouldings and Aluminium Windows and Doors, we are the one-stop resource for any new home, renovation, condominium, or commercial construction project.

At Fancy Windows, we are socially conscious and are always committed to supporting the communities where we live and work. We emphasize our support in the areas of educational organizations, healthcare, community development, culture, environment, and sustainability.

WINDOWS**

# SLIDER/HUNG WINDOWS

Slides smooth horizontally with a sturdy roller, our energy efficient slider window is popular for new home and renovation projects.

Single hung windows open vertically and slider windows open horizontally. These windows are very durable, energy efficient, and have low maintenance when properly installed.

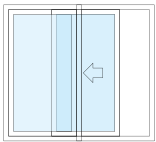

# SLIDER/HUNG WINDOWS

## Features

- Wide, durable, and low maintenance frame with high energy efficiency
- Available in both dual and triple pane
- Robust rollers for smooth sliding
- Multiple weatherstrips for water and air-tight seal
- Jamb options for various interior looks
- Brickmould options for better exterior finishes
- All-foam spacer for better performance
- Functional and easy-to-use window screens

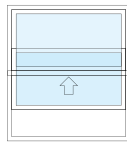

## Window Function

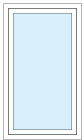

### Slider Window

Slides horizontally and sturdy roller helps easy to operate.

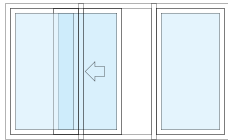

### Hung Window

Slides up and down vertically and easy to operate.

### Picture Window

Non-opening windows perfect for letting in natural light.

### Window Combination

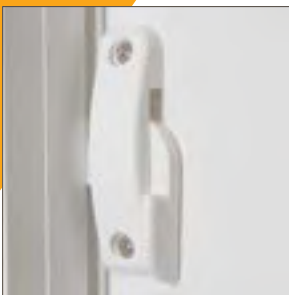

A combination of slider, hung, or picture windows to complement your home's overall design.

## Design Options

### Exterior Brickmould

Exterior trim options including Nail Fin, 1 1/2" and 2" PVC Renovation Brickmould. Subsill renovation option also available.

### Secure Latches

Latches are easy to use and provide secure lock position.

### Interior Jamb

Interior Jamb extensions available in PVC or Wood to fit your wall dimensions.

### Drain Cap

Drain caps prevent the water from the exterior to enter your home.

### Robust Roller

Built to last rollers allows smooth sliding operation to your window.

### All-Foam Spacer

All foam spacer provides excellent insulation to glass units. Protects from condensation.

## Colours

Custom colour options available.  
Ask a sales associate for colour options.

A photograph of a two-story house with a stone and stucco exterior. The house features a large, multi-paned window on the second floor and a larger, multi-paned window on the first floor. The roof is a light brown color. The background shows green trees. The text 'CASEMENT/ AWNING WINDOWS' is overlaid vertically on the right side of the image.

# CASEMENT/ AWNING WINDOWS

Opens outward with robust hardware, our energy efficient casement windows are fit in any home style, from traditional to contemporary.

A Casement window is attached to its frame by one or more hinges. Casement windows are hinged at the side, can be opened fully, and are easy to secure.

Awning windows are attached to top of the window frame by a hinge and open outward. They have a sleek, contemporary design and are great at providing a weather-tight seal.

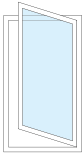

# CASEMENT/AWNING WINDOWS

## Features

- Wide, durable, and low maintenance frame with high energy efficiency
- Available in both dual and triple pane
- Stylish and easy-to-use hardware
- Multiple weatherstrips for water and air-tight seal

# ENTRY DOORS

Fancy Windows have some of the fanciest entry doors in Edmonton! Our exterior doors will keep your home and family warm during our long, harsh Edmonton winters. With the large selection and variety of styles on display at our showroom, your entry doors are sure to make a great impression and will be the envy of the neighbourhood.

## Modern Entry Doors

Throughout history, humanity has striven to build beautifully. Architects, master builders, and artisans, all have tried to push the envelope with bold new designs. We offer Modern Doors for home owners desiring a contemporary and forward look. Add daring curves or sharp angles depending on the door you chose for your home. When you choose Fancy Windows you get a modern and stylish designer door available in either solo or double door varieties.

## Fiberglass Entry Doors

Fiberglass doors look great, and are built to a high quality standard. Traditional wood products may crack, split or peel after years of use, however, Fiberglass doors are designed to repel all types of weather. Our Fiberglass doors are engineered for the Canadian climate. Fiberglass exterior doors come in many prefabricated designs and textures. They also come primed and ready for our customers to finish just the way they like. Fiberglass doors are an energy efficient upgrade for any home.

## Steel Entry Doors

Our steel entry doors are exceptionally durable and provide your home with safety, security and protection against the elements. Exterior metal doors come in a wide variety of designs and can be upgraded with decorative glass inserts. Fancy Doors also carries the popular mini-blind door to allow in natural light while allowing for exceptional privacy control.
