## *...See the Difference*

Fancy Windows Mfg. Inc. is a Canadian owned and operated company based in Edmonton, Alberta. Equipped with 100,000 square feet of the production facility and state-of-the-art technology, we manufacture top quality energy efficient windows and doors. Our products are available in both PVC and aluminum material with various operating styles. With a decade of industry expertise and a reliable partner for window manufacturers, Fancy Windows meets the requirements of our customers with high level of quality products, delivery capability, and competent service. We offer our products and services to homeowners, builders and trade professionals. We also undertake recycling initiatives at our production facility which reduces waste and ensures that our product is more environmentally friendly.

Windows are more than just openings to the world, they are a characteristic feature of your home. The design and style of windows plays a crucial role in defining the overall look of your residence.

With our partnership with Fancy Doors and Mouldings and Aluminium Windows and Doors, we are the one-stop resource for any new home, renovation, condominium, or commercial construction project.

At Fancy Windows, we are socially conscious and are always committed to supporting the communities where we live and work. We emphasize our support in the areas of educational organizations, healthcare, community development, culture, environment, and sustainability.

WINDOWS**

# SLIDER/HUNG WINDOWS

Slides smooth horizontally with a sturdy roller, our energy efficient slider window is popular for new home and renovation projects.

Single hung windows open vertically and slider windows open horizontally. These windows are very durable, energy efficient, and have low maintenance when properly installed.

# SLIDER/HUNG WINDOWS

## Features

- Wide, durable, and low maintenance frame with high energy efficiency
- Available in both dual and triple pane
- Robust rollers for smooth sliding
- Multiple weatherstrips for water and air-tight seal
- Jamb options for various interior looks
- Brickmould options for better exterior finishes
- All-foam spacer for better performance
- Functional and easy-to-use window screens

## Window Function

### Slider Window

Slides horizontally and sturdy roller helps easy to operate.

### Hung Window

Slides up and down vertically and easy to operate.

### Picture Window

Non-opening windows perfect for letting in natural light.

### Window Combination

A combination of slider, hung, or picture windows to complement your home's overall design.

## Design Options

### Exterior Brickmould

Exterior trim options including Nail Fin, 1 1/2" and 2" PVC Renovation Brickmould. Subsill renovation option also available.

### Secure Latches

Latches are easy to use and provide secure lock position.

### Interior Jamb

Interior Jamb extensions available in PVC or Wood to fit your wall dimensions.

### Drain Cap

Drain caps prevent the water from the exterior to enter your home.

### Robust Roller

Built to last rollers allows smooth sliding operation to your window.

### All-Foam Spacer

All foam spacer provides excellent insulation to glass units. Protects from condensation.

## Colours

White

Jet Black

Renolit  
Bronze

Graphite

Custom colour options available.  
Ask a sales associate for colour options.

A photograph of a two-story house with a stone and stucco exterior. The house features a large multi-paned window on the second floor and a larger multi-paned window on the first floor. The roof is a light brown shingle. The background shows green trees. The image is partially overlaid by a dark blue and yellow geometric graphic on the right side.

# CASEMENT/ AWNING WINDOWS

Opens outward with robust hardware, our energy efficient casement windows are fit in any home style, from traditional to contemporary.

A Casement window is attached to its frame by one or more hinges. Casement windows are hinged at the side, can be opened fully, and are easy to secure.

Awning windows are attached to top of the window frame by a hinge and open outward. They have a sleek, contemporary design and are great at providing a weather-tight seal.

# CASEMENT/AWNING WINDOWS

## Features

- Wide, durable, and low maintenance frame with high energy efficiency
- Available in both dual and triple pane
- Stylish and easy-to-use hardware
- Multiple weatherstrips for water and air-tight seal
- Jamb options for various interior looks
- Brickmould options for better exterior finishes
- All-foam spacer for better performance
- Functional and easy-to-use window screens

## Window Function

### Casement Window

Opens outward from the side and is easily secured with hardware.

### Awning Window

Opens outwards from the bottom and is easily secured with hardware.

### Picture Window

Non-opening windows perfect for letting in natural light.

### Window Combination

A combination of casement, awning or picture windows to complement your home's overall design.

## Design Options

# ALUMINUM WINDOWS FOR COMMERCIAL PROJECTS

In a short time since its inception, Fancy Windows commercial division has created a reputation in delivering projects on time. Repeat clientele is a testament to our quality, integrity, and commitment.

We specialize in the manufacturing and installation of curtain wall facades, high-performance window wall facades, and shopfront facades for multi-story commercial and residential buildings along with interior glass walls and partitions. We have the experience to deliver commercial aluminum windows for projects like a hotel, high rise, or residential condo.

Our innovative approach to design, manufacturing, and installation ensures Canadian builders can access the right skills and products at the most cost-competitive price.

# COMMERCIAL ALUMINUM WINDOWS

## Features

- 2" sight line and multiple system depths for structural as well as aesthetic requirements.
- Can be installed using either captured or structural silicone-glazed vertical mullions.
- Polyamide pressure plate available for high thermal installations.
- Integration of the Solar Eclipse sun control product offering a wide range of engineering options.
- Low profile corner mullions.
- Heavy duty mullion and aluminum structural reinforcements for higher design criteria
- Accommodates Signature Series ZeroSightline-HT projected and casement vents
- Accommodates low profile door frames for entrance doors
- Factory-painted KYNAR 500/HYLAR 5000 finishes, meeting all provisions of AAMA 2605
- Factory-anodized finishing

## Performance

- Air Infiltration: < .06 CFM/sq.ft. (6.24 PSF) per ASTM E283.
- Static Water: 15 PSF per ASTM E331
- Dynamic Water: 20 PSF per AAMA 501.1
- Deflection Load: 40 PSF per ASTM E330
- Structural Load: 60 PSF per ASTM E330
- Seismic: Three levels of deflection per AAMA 501.4
- Vertical Inter-Story Drift: 1/2" movement per AAMA 501.7
- STC: 32 (1/4" - 1/2" - 1/4" glazing)  
37 (1/4" lam - 1/2" - 1/4" lam glazing)
- Thermal performance per AAMA 1503 for Sunglass Low-E:
  - U-factor = .42
  - CRF frame = 68
- NFRC certified
- Thermal Performance Characteristics per AAMA 507
